Consulting

Consulting is now available from Cascade STEAM, leveraging our team's extensive experience collaborating with partners and clients to progress their business, technology, education, and community engagement goals.

Our **Consulting Projects** are led by highly experienced business and technology professionals. We partner with trusted local service providers as needed, and feature distinguished student interns and accomplished mentors via our ***Service Corps*** program when appropriate.

How It Works

We offer a **FREE Consultation** as a community service: We'll meet for an **Introduction**, do some basic **Discovery** to explore options, and provide our **Recommendation.** If we can be of assistance: We will provide a written **Proposal** to create a **Consulting Project**.

If we require additional information to solidify our project together: We'll perform an **Expanded Discovery**, provide a written **Assessment**, revise our **Proposal** with an updated **Project Scope**, and confirm the details of our **Consulting Project** before proceeding.

Cost

While every project varies, a discount is provided when including student interns and mentors via our ***Service Corps*** program, and an additional discount is provided to fellow non-profit organizations.

Let's Collaborate

Everyone wins! Businesses and Organizations receive discounted consulting services from highly experienced professionals. Interns get valuable training and real-world, hands-on experience. Cascade STEAM re-invests in our ***Consulting*** and ***Service Corps*** programs. And we all contribute to ***Building a collaborative, supportive, and civic-minded STEAM community for social good.***

Please contact us at ***consulting@cascadesteam.org*** regarding the ***Consulting*** Program.
