
Our Programs

Our efforts are organized into **Community Groups** and **Community Projects**.

Community Groups convene aspiring, current, and retired professionals interested in a STEAM topic to connect with fellow community members for technical discussion and to socialize, including **Artificial Intelligence**, **Citizen Science**, **Cyber**, **Data Engineering**, **Engineering**, **Spectrum**, and **Open Source**.

Collaborations evolve into **Community Projects** to further our efforts of community building and community service, and often collaborate with **Community Partners** in shared purpose, including:

Community Building:

- **Artificial Intelligence Workshops** for collective AI training with a focus on community work.
- **Breach** is a cybersecurity-focused game of capture the flag teaching security concepts.
- **Collaborative Internship** extends Service Corps with local organizations to facilitate internships.
- **Consulting** provides business, technology, and community engagement services.
- **Educational Robotics** provides support for the Bellingham Public Schools Robotics Program.
- **Hack Night** is a weekly collaborative night for personal, professional, and community projects.
- **LinuxFest Northwest** is an open source technology conference that we co-organize.
- **Mentorship** connects mentors and mentees in traditional or peer mentorship relationships.
- **Service Corps** is a technology training and community service program for social good.
- **Stormwater Monitoring** provides support for the RE Sources Water Keeper Program.

Community Service:

- **Digital Navigators** provides FREE basic technology support for social service patrons.
- **Help Desk** provides FREE technology support for the general public by suggested donation.
- **Reuse** refurbishes donated technology equipment for a new, productive use in our community.

Cascade STEAM programs and events strive to be **Free. Open to everyone. Bring your friends.**

Get Involved

Interested in getting involved? Volunteer? Collaborate? We'd love to hear from you! Please email us at info@cascadesteam.org or visit us at our **Community Hub**.
